FEDERAL INSTITUTE OF SCIENCE AND TECHNOLOGY (FISAT)[®]

Policy on Industry Internships/ Summer training for Students

By integrating conceptual knowledge and training through academic internship programmes, students of the Federal Institute of Science and Technology (FISAT) are facilitated to better implement their concepts in the workplace. The internship enables students to gain first-hand exposure to working in the real world. It also allows students to harness the skill, knowledge, and theoretical practice they learned in university.

Internships are an excellent source of gaining practical experience, practicing teamwork, building resumes, and building professional relationships.

- Students attend internships at an appropriate industry/organization related to the university's area of study.
- The training is finalized after obtaining permission from the concerned authorities of the department (mentor, HoD)/institution(Principal)/Director.
- The students are expected to follow professional ethics during the entire training course.
- Mentor maintains a record of the particulars (certificate, report, feedback) of the training programmes attended by each student.
- The mentor does impact analysis of the same during the last semester of the programmes.
- If the internship or projects are done as a compulsory component as per the University curriculum, external and internal assessments are carried out based on the University guidelines.
