Policy on Syllabus and Curriculum Evaluation

The Federal Institute of Science and Technology (FISAT) gives significant importance to curriculum and syllabus evaluation to determine their effectiveness and identify areas for improvement.

Every academic year, an evaluation of the different curricula followed for various courses in the institution shall be done by faculty members handling courses in that curriculum through a feedback mechanism. The curriculum evaluation shall be carried out at the end of the academic year.

The curriculum is evaluated to ensure that the stated outcomes can be achieved, recent advances in the respective domain are included, outdated material is not included, and to identify the gaps between the stated outcomes and requirements of the industry,

Students shall also be encouraged to give feedback on the curriculum through an online feedback system. Employers can report on the effectiveness of the curriculum through a feedback system available in the institution portal. Parents also shall be encouraged to evaluate the curriculum through the feedback portal. Deficiencies identified in the curriculum shall be consolidated and communicated to the university for consideration through official means from the institution as required. If the identified gap can be filled with learning outcomes by the faculty handling the course or at the department/institution level, then activities for gap filling are planned and executed in discussion with the Course Assessment Committee (CAC).
